## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Applicants are required to elect one species of "a" by electing styrene elastomers with diene or electing those without diene and to also elect either linear or radial thermoplastic elastomers and if applicants elect thermoplastic elastomers with diene they should elect dienes from one of butadiene or isoprene or dienes not including isoprene or butadiene and lastly applicants should elect either thermoplastic elastomers which are hydrogenated or those which are not hydrogenated. Applicants should also elect a single thermoplastic alpha olefin "b" by electing a single choice of such from those set out in claim 80. Applicants should also elect a single choice for "c" from one of those set out in claim 81. Applicants should also elect a single coupling agent "d" by electing either unsaturated silanes or unsaturated epoxides or unsaturated dicarboxylic acids or unsaturated monocarboxylic acids or titanates or zirconates or aluminates.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

Art Unit: 1796

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

All claims read on multiple species.

The following claim(s) are generic: all claims are generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Johnson (US 5157082) in Table 2 in column 6 discloses blends of rubber particles and styrenic block copolymer and in which maleic acid as in applicants "d" is reacted therein. Applicants specific species of elastomeric material therefore lacks novelty and applicants species can not be said to have the same or corresponding technical feature.

Due to the complexity of this requirement, no telephone election was attempted.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
